U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Russian Original Copyright
Nauka, 90 Profsoyuznaya ul., Moscow 117485
6 issues/annum

SCIENTIFIC TRANSLATION EDITOR:

R. C. GLASS, M.A., M.Sc.,
The City University, London

Translators: D. E. BROWN, R. C. GLASS, Z. LERMAN, D. LOUVISH, S. RHODES, E. L. SHORT
and H. TURNER

Publishing and Advertising Office:

Pergamon Press plc, Headington Hill Hall, Oxford, OX3 0BW, U.K.

Subscription Rates

Annual Institutional subscription rate (1990) DM 2120.00

2-year Institutional rate (1990/91) DM 4028.00

*Subscriptions are only serviced after payment has been received and
are not accepted for less than one year. Prices are subject to change without notice.*

Subscription enquiries from customers in America should be sent to:

Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.,

and for the remainder of the world to:

Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K.

Microform Subscriptions and Back Issues

Back issues of Pergamon journals, both in hard copy and on microform,
are available direct from Pergamon Press offices.

VOLUME CONTENTS

VOL. 28, NO. 1

CONTENTS

1988

	Translation of Number 1
A. B. BELYAYEV and I. S. MEN'SHIKOV	1 On compromise schemes in dynamic models of conflicting situations
M. M. AD'YUTOV and L. A. LEPIN	8 Selfsimilar solutions of the non-linear equation of heat conduction with distributed parameters in the case of constant heat conduction
A. V. BAYEV	15 A method of solving the inverse scattering problem for the wave equation
M. P. BELYANIN	21 The asymptotic form in the one-dimensional model of some semiconductor devices
S. T. SIMAKOV	34 A problem related to the oscillations of a compressible stratified liquid
S. A. GABOV and YU. D. PLETNER	41 The problem of the oscillations of a flat disc in a stratified liquid
I. V. BELOVA and K. V. BRUSHLINSKII	47 A numerical model of the instability of a Z-pinch in a plasma of finite conductivity
I. V. VOLKOV	52 Gas-dynamic boundary conditions of slip on an uneven surface
I. KH. ENIKEYEV, O. F. KUZNETSOVA, V. A. POLYANSKII and E. F. SHURGAL'SKII	58 Mathematical modelling of two-phase twisted flows using a modified large-particle method
G. G. ELENIN, V. V. KRYLOV and N. V. SOSNIN	66 The problem of the solution of a dense filtering layer of crystals
M. GADOYEV	74 Convergence of the method of particles for the three-dimensional system of Vlasov equations
S. V. BOGOMOLOV	79 Convergence of the total-approximation method for the Boltzmann equation
	Short Communications
KH. D. IKRAMOV	85 Singular numbers and polar factorization of an operator in a bilinear metric space
A. B. PEVNYI	87 Optimality of the spline algorithm for finding the maximum of a class of functions of several variables
B. B. POKHODZEI	91 The modelling of truncated distributions
YU. S. KOSOLAPOV	93 Numerical solution of the problem of the supersonic flow of a gas from a plane slit in hodograph variables
A. A. CHARAKHCH'YAN	97 The effect of false cumulation for Godunov's scheme on moving grids
YU. M. SEMENETS	100 Basic kinetic equation for the rarefied gas model used in the statistical particle-in-cell method
YU. R. BATYUK, M. S. SYAVAVKO and V. G. SHIBANOV	103 Rational approximations of the evolution operator
V. D. VALEDINSKII and A. B. ISAKOV	104 On the difference analogue of the inequality $\ p\ _{L_2} \leq C \ \text{grad } p\ _{W_2^{-1}}$ in spherical coordinates
	Translation of Number 2
B. SH. MORDUKHOVICH	106 An approximate maximum principle for finite-difference control systems
M. K. ZAVRIYEVA	115 Convergence estimates for different versions of the penalty method of seeking a max-min with linked variables
N. M. NOVIKOVA	120 Stochastic methods for the numerical solution of convex variational inequalities
V. V. POSPELOV	127 A method of investigating the stability and accuracy of difference schemes
U. LANGER	135 A fast iterative method for solving the first biharmonic boundary-value problem

M. P. BELYANIN and A. B. VASIL'YEVA	145	On the interior transitional layer in a problem of semiconductor film theory
YU. V. KOBVLINSKII, T. L. POPKOVA and G. YA. SLEPYAN	154	The method of non-orthogonal series for the numerical solution of problems of mathematical physics
P. B. DMITRIYEV	161	The theory of capillary waves on the surface of a rotating liquid
M. KH. STRELETS and M. L. SHUR	165	Methods of scaling the compressibility in calculating stationary flows of a viscous gas at arbitrary Mach numbers
A. V. BABAKOV	173	On the possibility of the numerical modelling of non-stationary vortex structures in a near wake
Short Communications		
A. M. CHEBOTARYEV	180	The fast Fourier transform in a problem with multiple grid-points
G. P. PANASENKO	183	Numerical solution of cell problems in averaging theory
B. V. ALEKSEYEV and S. A. USTYUGOV	187	Numerical solution of the generalized equations of gas dynamics
S. V. BOGOMOLOV	190	Fluctuations of the method of particles for the Vlasov equation
AN. V. LUKSHIN and S. N. SMIRNOV	192	On a stochastic method of solving the Boltzmann equation
V. A. VORONINA	196	A method for constructing a solution of the spatially homogeneous Boltzmann equation for a mixture of gases

VOL. 28, NO. 2

CONTENTS

1988

YU. M. KANIOVSKII	Translation of Number 3
V. M. PANIN	1 The sufficient conditions for the convergence of the method of successive approximations with discontinuous functions
A. I. KALININ	6 A linear method of finite penalties with regulated ϵ -descent
S. A. GABOV	12 Optimization of quasilinear control systems
V. F. BUTUZOV and A. B. VASIL'YEVA	19 The theory of interior waves when a free surface is present
A. A. OSIPOV and I. A. SHIRKOVSKII	26 The asymptotic theory of contrasting spatial structures
L. S. KLABUKOVA and I. I. CHECHEL	37 The use of the finite-element method to calculate acoustic fields in inhomogeneous gas flows
YU. V. APANOVICH and E. D. LYUMKIS	45 A variational-difference method for solving boundary-value problems in the theory of shells using Vekua's moment theory
V. A. PEREPELTSIA and I. V. SERGIENKO	57 Difference schemes for the Navier-Stokes equations on a net consisting of Dirichlet cells
O. R. CHUYAN	63 A study of one class of integer multicriterion problems
E. A. KAZ'MINA	76 The relationship between guaranteed results in sequential and non- sequential algorithms
N. A. NEDASHKOVSKII	82 Probabilistic semantics of terminating programs
N. N. TRENEV	Short Communications
S. I. REPIN	88 Solution of systems of algebraic equations with λ matrices
N. A. DAR'IN and V. I. MAZHUKIN	92 Some algorithms for comparing partial solutions in distributed systems
YU. A. LEBEDEV and N. A. TIKHONOV	96 A variational difference method for solving problems of ideal plasticity in which discontinuities may appear
	99 An approach to adaptive grid construction for non-stationary problems
	104 Mathematical modelling of the process of water purification in the ion-exchange filter of an industrial plant

A. S. ROMANOV	107	Comparison of solutions of the Cauchy problem for a class of integro-differential equations
A. ARTYKOV	110	An N-dimensional generalization of an initial boundary value problem that arises in the theory of internal waves
	111	Corrigenda
		Translation of Number 4
I. M. SOBOL	112	Determination of the extremal values of a function of several variables satisfying a generalized Lipschitz condition
I. P. BOGLAYEV	118	A numerical method for solving quasilinear elliptic equations with a small parameter for the highest derivatives
S. A. IVANENKO and A. A. CHARAKHCH'YAN	126	Curvilinear grids of convex quadrilaterals
G. L. SIGANEVICH	134	A version of the fictitious-domain method
YU. D. PLETNER	139	Gyroscopic gravitational waves caused by the oscillations of a straight section
A. A. TIKILYAINEN	146	A problem connected with the theory of planetary waves
F. V. BUNKIN, V. A. GALAKTIONOV, N. A. KIRICHENKO, S. P. KURDYUMOV and A. A. SAMARSKII	157	A non-linear boundary value problem of ignition by radiation
A. A. ARSEN'YEV	164	The approximation of the Boltzmann equation by stochastic equations
G. D. VASIL'KOV, I. I. EVSTIGNEYEV and M. E. ZHUKOVSKII	170	A procedure for calculating electromagnetic fields in a quasithree-dimensional model
M. A. KRAVTSOVA and A. I. RUBAN	177	Detachment of a supersonic boundary layer in front of the bottom edge of a contour of a body
O. S. RYZHOV and I. V. SAVENKOV	185	Spatial perturbations introduced by a harmonic oscillator in a boundary layer on a plate
		Short Communications
V. K. DURAKOVA, V. A. NOVIKOV and E. A. NOVIKOV	193	Explicit first-order Runge-Kutta methods with a given stability interval
S. A. GABOV and M. B. TVERSKOI	197	On the flow of a stratified fluid past an obstacle
V. B. MITROFANOV and A. KH. PERGAMENT	201	The EOS-2 system for processing X-ray pictures of a high-temperature laser plasma
A. V. PANYUKOV and B. V. PEL'TSVERGER	204	The optimal distribution of a tree in a finite set

VOL. 28, NO. 3

CONTENTS

1988

		Translation of Number 5
A. I. MOISEYEV	1	Computation of certain functions related to the Hurwitz zeta-function
M. V. FEDORYUK	7	The asymptotic form of radial Lamé wave functions
O. R. MEN'SHIKOVA and V. V. PODINOVSKII	15	Constructing the preference relation and the core in multicriterion problems with inhomogeneous criteria ordered by importance
S. A. NEKRASOV	23	The construction of two-sided approximations to the solution of a Cauchy problem
YU. N. MOKIN	29	Direct and iterative methods for solving the integral equations of potential theory
V. F. BUTUZOV and L. V. KALACHEV	39	Asymptotic behaviour of the solution of the problem of combustion in the case of an autocatalytic reaction

G. G. ELENIN and E. S. KURKINA	48	The multiplicity of stationary states in one non-ideal model of a heterogeneous catalytic reaction
G. T. GOLOVIN	55	A method of analysing steady-state relativistic beams in long diodes
V. A. GASILOV, S. F. KRYLOV, O. S. SOROKOVIKOVA and S. I. TKACHENKO	62	The application of fully conservative difference schemes to the calculation of two-dimensional magnetohydrodynamic systems
M. V. KHAZANOV	71	A method for the numerical solution of the one-dimensional hydrodynamic equations of a two-phase gas-liquid mixture
A. P. FILIPPOVICH	79	Analysis of mixed schemes of the finite element method in problems of the deformation of shallow shells
Short Communications		
YU. L. LEVITAN, N. I. MARKOVICH, S. G. ROZIN and I. M. SOBOL	88	On quasirandom sequences for numerical computations
I. O. YAROSHCHUK	92	A method for the numerical modelling of waves in a one-dimensional non-linear medium with random inhomogeneities
A. V. LUKSHIN and S. N. SMIRNOV	96	A stochastic algorithm for solving the Boltzmann equation based on Euler's method
V. A. VORONINA	99	A method of constructing the solution of the system of Boltzmann equations for reacting gases
O. I. ZVAROVA	104	The properties of the collision integrals in the Boltzmann equation of semiconductor theory
R. K. TAGIYEV	108	Convergence of difference approximations and regularization of the optimal control problem for an ordinary linear differential equation of the second order
Translation of Number 6		
S. L. BLYUMIN, YU. I. DENISENKO and S. P. MILOVIDOV	109	Investigation and solution of integer systems of linear equations
V. YA. ARSENIN, YU. A. KRIKIN and A. A. TIMONOV	113	A local regularization method for linear operator equations of the first kind and its applications
A. YU. VERETENNIKOV	125	The mean-square convergence of stochastic iterative procedures in ill-posed problems
I. M. ISLAMOV	129	Asymptotic regularization of an ill-posed identification problem
O. V. LEVCHUK and A. M. FEDOTOV	136	Construction of minimax solutions of linear ill-posed problems with random errors in the data
E. A. VOLKOV	143	Approximate conformal mapping by the block method of a circle with a polygonal hole into a ring
V. A. GALAKTIONOV and S. A. POSASHKOV	148	A method of investigating unbounded solutions of quasilinear parabolic equations
G. A. BIRNOVSKII	156	On optimal control of multiphase porous flow in an oil bed
A. L. GONCHAROV and I. V. FRYAZINOV	164	Difference schemes on a nine-point "cross" pattern for solving the Navier-Stokes equations
YU. A. EREMIN and A. G. SVESHNIKOV	172	The use of conjugate equations in the method of auxiliary sources
S. YU. KOVENSKII and A. V. TIKHONRAVOV	178	Synthesis of absorbing layered media
I. N. KOLYSHKIN, A. YA. ENDER and I. A. ENDER	187	Numerical solution of isotropic relaxation problems by the method of Maxwellian expansion
YU. V. KNYAZIKHIN	198	Seidel's method for the transport equation with anisotropic scattering in R^3
T. G. ELIZAROVA	205	Boundary conditions for kinetically consistent difference schemes in gas dynamics

A. B. BAKUSHINSKII, A. V. GONCHARSKII and S. YU. LEVITAN	210	Short Communications Fast linear iterative algorithms of image restoration
A. S. BARASHKOV	214	On the uniqueness of quasisolutions of operator equations
V. I. ZHUK	216	On the current in a free interaction region near a permeable wall portion
P. I. KAPITANETS and V. V. LUNEV	219	The shock-characteristic method for solving discontinuous problems in gas dynamics
A. M. STERLIN	223	Generalization of the interior modified Lagrange function for the solution of the general mathematical programming problem
N. V. POGORELOV	225	Similarity transformations of matrices in the stationary equations of gas-dynamics
V. I. VYSOTSKII, R. N. KUZ'MIN and N. P. SAVENKOVA	226	Numerical analysis of the orientational motion of neutral particles in crystals

VOL. 28, NO. 4

CONTENTS

1988

		Translation of Number 7
A. M. FEDOTOV	1	Construction of optimal solution procedures for operator equations
V. V. VASIN	6	Iterative methods for solving ill-posed problems with <i>a priori</i> information in Hilbert spaces
A. L. ALIMOV	13	A method of data compression for the digital correction of the readings of a measuring system
S. L. UTKIN, V. R. KHACHATUROV and H. TUY	20	Conical algorithms for solving a concave programming problem and some generalizations
SH. I. GALIYEV	25	Numerical solutions of minmaxmin problems
G. B. RUBAL'SKII	33	The halving method in the hole-filling problem
G. G. MALINETSKII and A. B. POTAPOV	39	On calculating the dimension of strange attractors
V. A. KAZAKOV	50	An approach to using <i>B</i> splines in splitting schemes to solve the Navier-Stokes equations
L. S. KLABUKOVA	56	A variational difference method for solving problems of infinitesimal deformations of a surface of positive curvature
M. S. IVANOV and S. V. ROGAZINSKII	63	Comparative analysis of direct simulation algorithms in rarefied gas dynamics
V. A. GAL'BURT, M. F. IVANOV and O. A. RYABOV	72	On a method for calculating non-equilibrium gas-dynamic flows while simultaneously taking account of ionization and radiation transport
V. P. BASS and V. I. BRAZINSKII	77	Numerical algorithms for computing mass-transfer processes in a highly rarefied gas
		Short Communications
B. HOFMANN	88	A control algorithm for a multiparameter regularization process
K. N. BELASH and A. A. TRET'YAKOV	90	Methods for solving degenerate problems
A. P. CHERENKOV	95	The allocation of different types of resources with saturation
U. G. ABDULLAYEV and A. D. ISKENDEROV	100	The well-posed nature of the problem of determining an unknown boundary of a domain in a similarity regime
P. N. ZHEVANDROV	102	Ship waves on the surface of a floating liquid
		Translation of Number 8
A. M. LEVIN	107	Modification of Newton's and the secants methods and their applications in regularizing algorithms

A. YU. YEREMIN, I. E. KAPORIN and M. K. KERIMOV	115	Computation of the derivatives of the Riemann zeta-function in the complex domain
A. A. EGORUSHKIN, N. B. ZYABREV and A. N. TIKHONOV	125	A multifactor problem of non-linear programming with a decreasing input function
YU. B. LIFSHITS and A. A. SHAGAYEV	134	A mesh-projection scheme for computing transonic flow past an aerofoil
A. ZEMLA	143	Lattice approximations of the Helmholtz equation in a singularly-perturbed region
E. N. BULANZHE	151	Qualitative analysis of a dynamic model of a resource-limited age distribution
A. S. IL'INSKII and A. F. KADOMTSEVA	159	Application of the method of finite elements to the problem of the propagation of waves in an irregular waveguide
N. A. DAR'IN, V. I. MAZHUKIN and A. A. SAMARSKII	164	A finite-difference method for solving the equations of gas dynamics using adaptive nets which are dynamically associated with the solution
V. A. BRAILOVSKAYA and V. R. KOGAN	175	A method of computing periodic vortical currents of an incompressible fluid
A. P. BYRKIN and A. I. TOLSTYKH	180	Compact third- and fourth-order schemes in problems concerning internal flows of viscous and non-viscous gases
M. S. NIKOL'SKII		Short Communications
D. D. BUREV	192	A method of approximating an attainable set for a differential inclusion
A. N. ERMILOV, V. I. KABANOVICH and A. M. KURBATOV	194	Discrete analytical solution of a smooth non-linear optimal control problem
K. V. MAL'KOV	197	Analytic representation of Green's function for a finite-difference Laplace equation
S. V. BOGOMOLOV and V. A. LEBEDEV	198	Stabilization of the solutions of a certain non-linear integrodifferential kinetic equation
I. KH. SIGAL	202	Convergence of a difference scheme for solving a system of partial differential equations of the particle method for the Boltzmann equation
	205	An algorithm for the approximate solution of a large-scale travelling salesman problem in a plane

VOL. 28, NO. 5

CONTENTS

1988

L. N. BONDARENKO and P. F. ZHUK		Translation of Number 9
L. T. POZNYAK	1	Combined iterative methods of the variational type
P. B. DMITRIYEV	11	An estimate of the rate of convergence of Weinstein's method in the eigenvalue problem for an L-shaped membrane
YU. V. KNYAZIKHIN	20	Diffraction of a plane wave by a half-plane in a rotating liquid taking capillary forces into account
G. I. LAPTEV	27	On a class of iteration methods in linear transport theory
I. G. NEUDACHIN, V. A. PODDUBNYI and B. T. PORODNOV	35	Mathematical features of the problem of the penetration of a magnetic field into matter
S. G. PONOMAREV, V. G. PRIIMAK and B. L. ROZHDESTVENSKII	45	Some applications of the Boltzmann equation in problems of gas dynamics
A. A. OSIPOV and K. S. REYENT	50	Statistically stationary solutions of the Navier-Stokes equations in an annular channel. Hydrodynamic characteristics and space-time structure
	59	A method of integral equations for calculating the non-stationary aerodynamic characteristics of a rotating blading ring

V. I. DONSKOI	66	Weakly determinate problems of Boolean linear programming with a partially specified set of admissible solutions
O. L. CHERNYKH	71	Construction of the convex hull of a finite set of points when the computations are approximate
N. N. KATERINCHIKINA	78	Finding a maximal zero for some classes of monotone Boolean functions in Post's classification
V. A. GURVICH, A. V. KARZANOV and L. G. KHACHIVAN	85	Cyclic games and an algorithm to find minimax cycle means in directed graphs
V. A. STRIZHKOV		Short Communications
A. I. ZHDANOV	91	The well-posedness of potential-type Fredholm integral equations of the first kind for thin wires
S. A. IVANOV, V. P. KORNEYEV and Y. LANG	93	The solution of ill-posed stochastic linear algebraic equations by the maximum likelihood regularization method
K. V. KUDAKOV and S. V. TROFIMOV	97	Estimates of constants in inequalities for basis elements
V. I. KOROBV	102	An algorithm for synthesizing correct recognition procedures for problems with non-intersecting classes
L. V. BABUSHKINA, M. K. KERIMOV and A. I. NIKITIN		Translation of Number 10
A. I. GOLIKOV and G. G. KOTKIN	105	Regularization of extremal eigenvalues in the symmetric generalized problem
V. K. LEONT'YEV and K. KH. MAMUTOV	109	Algorithms for computing Bessel functions of half-integer order with complex arguments
YU. G. BULYCHEV	117	Characterization of the optimal set of the multicriterion optimization problem
S. V. ERSHOV and G. G. MALINETSII	126	Stability of solutions in problems of Boolean linear programming
S. A. IVANENKO	130	A method of integral support curves for solving the Cauchy problem for ordinary differential equations
S. A. GABOV	136	The solution of the inverse problem for the Perron-Frobenius equation
F. P. VASILYEV, B. G. KAGANOV, D. P. KOSTOMAROV and V. I. KUKULIN	141	Generation of non-degenerate meshes
V. B. GLASKO, B. N. NYUNIN, A. N. TIKHONOV and M. K. TRUBETSKOV	147	On the existence of steady waves of finite amplitude on the surface of a floating liquid
A. V. GONCHARSKII, M. V. KLIBANOV and V. V. STEPANOV	155	The penalty function method for solving many-particle quantum-mechanical problems
S. M. PONOMAREV	162	The problem of reducing the acoustic roar in the passenger compartment of an automobile
V. A. APARINOV, S. M. BELOTSERKOVSKII, I. K. LIFANOV and A. A. MIKHAILOV	169	Inverse problems of coherent optics. The use of the stationary phase method in problems of focussing radiation onto a curve
O. I. ZVAROVA and AN. V. LUKSHIN	177	Exact solutions of the equations of non-linear diffusion of a magnetic field
A. V. KNYAZEV and A. L. SKOROKHODOV	182	Calculation of the non-stationary aerodynamic characteristics of a body in the case of separated flow
A. B. SAMOKHIN	188	The approximation of the Boltzmann equation of semiconductor theory by stochastic equations
M. V. NOSKOV		Short Communications
	195	The rate of convergence of the method of steepest descent in a Euclidean norm
	196	A simple iterative method for solving linear operator equations
	200	Cubature formulae for the approximate integration of functions of three variables

VOL. 28, NO. 6

CONTENTS

1988

Translation of Number 11	
V. G. ZHADAN	1 An augmented Lagrange function method for multicriterion optimization problems
A. V. BAYEV	11 On the solution of the inverse boundary value problem for the wave equation with a discontinuous coefficient
N. A. FARKOVA	22 The use of Faber polynomials to solve systems of linear equations
G. I. SHISHKIN	32 A difference scheme for a singularly perturbed equation of parabolic type with discontinuous boundary conditions
S. I. SMAGIN	41 Numerical solution of the integral equation of the first kind with a weak singularity for the density of a simple layer potential
V. P. GERDT, A. YU. ZHARKOV, S. I. SVINOLUPOV and A. B. SHABAT	50 The use of computer algebra to investigate the integrability of non-linear evolution systems
V. V. VARLAMOV	57 The Cauchy problem for the equation describing acoustic waves in a medium with dispersion
T. G. ELIZAROVA and B. N. CHETVERYUSHKIN	64 Kinetically coordinated difference schemes for modelling flows of a viscous heat-conducting gas
E. I. ANDRIANKIN, V. A. ANDRUSHCHENKO and N. N. KHOLIN	75 A numerical technique for solving non-stationary spatial problems of the dynamics of elastoplastic media
A. V. DEMIN, V. A. KOROBITSYN, A. I. MAZURENKO and A. I. KHE	81 Calculation of the flows of a viscous incompressible liquid with a free surface on two dimensional Lagrangian nets
Short Communications	
V. N. PAUTOV and A. M. FRANK	88 An algorithm for constructing Dirichlet meshes for time-dependent problems based on local rearrangements
V. A. NEGANOV and E. I. NEFEDOV	92 Estimating the accuracy of approximate solutions of singular integral equations for the normal modes of strip and slotted structures
G. S. PALUBETSKIS	97 A generator of test quadratic assignment problems with known optimal solution
G. A. IL'YUSHINA	99 Mathematical modelling in the mechanics of continuous media
YU. D. SHMYGLEVSKII	103 Inversion of a singularity of the Navier-Stokes equations
M. B. AIDARKHANOV	105 An approach to analysing the initial information in pattern recognition problems
V. N. MEL'NIK and M. N. MOSKAL'KOV	109 On the coupled non-stationary electro-elastic oscillations of a piezo-ceramic cylinder with radial polarization
Translation of Number 12	
A. A. KONSTANTINOV, V. P. MASLOV and A. M. CHEBOTAREV	111 Shift of the boundary conditions for partial differential equations
L. V. BABUSHKINA, M. K. KERIMOV and A. I. NIKITIN	122 Algorithms for evaluating spherical Bessel functions in the complex domain
YU. A. KRYSOV	129 Consistency and stability of aggregation in parametric mathematical programming problems

V. S. IZHUTKIN and M. YU. KOKURIN	135	Reduced-direction methods for the non-linear programming problem
S. A. VOLOSHIN	146	On non-local implicit schemes
A. S. BARASHKOV	152	Asymptotic forms of the solution of the inverse problem for the Helmholtz equation
S. A. GABOV and M. B. TVERSKOI	159	Investigation of the linear equations of the dynamics of a compressible stratified fluid
P. A. KRUTITSKII	166	Small non-stationary vibrations of vertical plates in a channel with a stratified liquid
V. A. GONCHAROV, V. M. KRIVTSOV and A. A. CHARAKHCH'YAN	177	A numerical simulation scheme for subsonic flows in a viscous compressible gas
S. V. KULIKOV and M. E. SOLOV'YEVA	183	The efficiency of the statistical modelling of a shock wave in a gaseous mixture
V. B. KARAMYSEV and V. M. KOVENYA	188	The predictor-corrector method for solving problems of gas dynamics
V. I. NAIDENOV	194	On the non-linear equations of the selfsimilar motion of a viscous fluid
		Short Communications
KH. D. IKRAMOV	203	Undecomposable Hamiltonian matrices with pure imaginary spectrum
B. B. POKHODZEI	207	A note on beta-methods for simulating binomial distributions
A. O. ALEKSEYEV, O. G. ALEKSEYEV, V. D. KISELEV and G. P. MIROVITSKII	208	An experimental estimate of the effectiveness of using duality to solve discrete programming problems
A. I. ZEIFMAN	210	Truncation error in a birth and death system
S. I. PISKAREV	211	A method of increasing the accuracy of the solution of initial problems in Banach space
